

Creating all necessary Azure resources

In this part of the repository you will find instructions to create all necessary Azure resources for re-creating the applications for yourself.

Prerequisites

We assume you have a subscription for Azure. If not, you can get one very easily

Steps

There is no specific order to create the resources. However, we suggest this order (click on the resource to be brought to the corresponding guide):

1. [Storage accounts](#)
2. [Document intelligence](#)
3. [Azure Database for MySQL flexible server](#)
4. [Azure OpenAI](#)
5. [Search service](#)
